Education for ALL
Universal Design for Learning: Addressing Student Diversity

This workshop is for secondary and post-secondary educators who are interested in ways to design instruction to meet the needs of diverse learners.

Teacher alert! Looking for strategies and methods that will engage the diverse learners in your classroom? Interested in using technology tools to support students with disabilities, non-traditional students and English language learners? Wondering what the acronym UDL stands for? If you said yes, this workshop is for you.

In this workshop you will learn the nuts and bolts of the Universal Design for Learning (UDL) framework and how to apply the principles and guidelines to curriculum and instruction. We will describe how UDL can be translated into practice through flexible methods, materials and assessments. The workshop will address traditional “face-to-face” instruction and online instructional environments.

What to bring: real life scenarios, a lesson plan or situation, which you would like to modify or re-design.

Who we are: We are faculty at the College of Education, University of Hawaii who have had extensive experience including research and application in Universal Design for Learning in online and offline environments.

Learning Outcomes:
1. Participants will learn three principles of Universal Design for Learning (UDL) that can be applied to curriculum and instruction.
2. Participants will be exposed to UDL tools or techniques they can use in their classrooms.
3. Participants will learn how to integrate UDL into distance education courses and trainings.
4. Participants will redesign a lesson plan or instructional sequence.
